

# BETA 250,350&450

## ADVENTURE tents

**Update**

This versatile tunnel design features a huge porch area with double entrance, which can be used for gear storage, bikes and provisions. The higher central pole makes the porch area spacious enough to be also used as living space if the weather dictates that being inside is better than out. A firm favourite in the Vango collection as it offers fantastic space, with ease of pitching in a relatively lightweight package that can be split between 3 to carry.

Optional Additions available
